

WORLD HAPPENINGS
BRIEFLY TOLD

Nearly 40,000 ships were piloted in the River Clyde, Scotland, in 1944, with a gross tonnage of about 120,000,000.

Of 40,160 South African ex-service men who have applied for assistance, 4,500 want to be full-time university students.

B.C. poultry flocks average 600 birds, and most of them range from 100 to 1,500 birds, according to a survey.

The United States Navy said that atomic bomb tests against warships would be conducted some time this year, but not before spring.

Canadian firemen who served as volunteers in Britain during the war were thanked by Herbert Morrison, deputy prime minister of Britain.

Butter production in Australia during 1944-45 season has been estimated at less than 32,000 tons, or the lowest for over 20 years.

The first raw silk shipment to come to North America from the Orient since outbreak of the Pacific war arrived at San Francisco aboard the freighter President Grant.

Queen Mary has presented the Great Ormond Street Hospital for Sick Children with nine scrapbooks of pictures and photographs commemorating events in the lives of the royal family.

The Dominion Bureau of Statistics recorded its official cost-of-living index, calculated on the basis that 1935-39 equals 100, advanced from 119.9 at Nov. 1 to 120.1 at Dec. 1, bringing the increase since September, 1939, to 19.1 per cent.

INQUISTS ASKED IN DIPHTHERIA DEATHS
Recent statement of Maj.-Gen. Brock Chisholm, Deputy Minister of National Health, that any danger from diphtheria is from ignorance and not from the disease itself, which protects children from diphtheria, has drawn support from prominent officials of the Health League of Canada.

Dr. Nellie Silverthorne, chairman of the League's National Immunization Committee, said that the truth of Gen. Chisholm's statement was borne out by the fact that of the seven children who died during the current diphtheria outbreak in Ottawa, not one had been immunized.

"This simple evidence alone proves the value of toxoid," Dr. Silverthorne said. "It is beyond comprehension why parents neglect to have their children given harmless toxoid protection when such protection is so easily available in Canada today."

"It's too bad that it's taken an epidemic to make people realize the truth," he said in commenting on the fact that attendance at Ottawa's clinics for toxoid injections has increased more than 300 per cent since the war began.

Dr. Gordon Bates, General Director of the League, said he agrees with Gen. Chisholm that vigorous action is necessary.

"I trust that the 'Health Week'—February 10-17—will do much to draw the attention of all Canadians that the fact that much disease is needless—preventable. For instance, universal use of toxoid will wipe out diphtheria. National Immunization Week last year called attention to the home facts, but still there are thousands of parents who have been too indifferent to act."

"If parents, knowing the facts, are still too indifferent and careless to protect their children by having them immunized, then the League and such parents may be held responsible."

"I suggest a coroner's inquest in the case of diphtheria deaths might serve to awaken the public consciousness."

Dr. Bates remarked that Health Minister Jose R. Andron of Cuba recently ordered that protection against diphtheria for all children under eight years of age be made compulsory.

"Apparently that is what we need in this country," he said.

STILL CONTRIBUTING

Conscientious objectors are continuing to make contributions to the Red Cross from their earnings and will continue to do so until the majority of Canadian overseas forces have returned, Arthur MacNamara, Deputy Minister of Labor, said. Some 8,000 of Canada's 8,200 objectors are engaged in farm work and those whose earnings more than \$1,000,000 has been contributed to the Red Cross.

Nearly a billion people live on the lands of southeastern Asia, in about seven or eight per cent of the earth's land area.

Seamen's Comforts

Daughters Of The Empire Have Performed A Wonderful Service For Crews Of Ships

During the war years, the Imperial Order Daughters of the Empire provided comforts and amusements to British, Canadian and Allied Service men at nearly a million dollars according to Mrs. H. S. Angus, National War Service Convener. This assistance has been given in various ways: thousands of games and puzzles, millions of magazines, over 100,000 books and reading books have been provided through the Order for seamen in hospitals, hospitals, the naval libraries and ships.

It is of interest to note that not only have books by English and French been given but the most requested Dutch, Polish, Norwegian and Greek seamen who put into Canadian ports, for books in their own language, appeals were made by the Order in the United States and Canada for the books which seamen receive are placed on the ships.

Butter production in Australia during 1944-45 season has been estimated at less than 32,000 tons, or the lowest for over 20 years.

The first raw silk shipment to come to North America from the Orient since outbreak of the Pacific war arrived at San Francisco aboard the freighter President Grant.

Queen Mary has presented the Great Ormond Street Hospital for Sick Children with nine scrapbooks of pictures and photographs commemorating events in the lives of the royal family.

The Dominion Bureau of Statistics recorded its official cost-of-living index, calculated on the basis that 1935-39 equals 100, advanced from 119.9 at Nov. 1 to 120.1 at Dec. 1, bringing the increase since September, 1939, to 19.1 per cent.

In addition, comforts have been provided in both Canadian and British ports, the I.O.D.E. operating distributing depots at Saint John, N.B. and Sydney, N.S., and according to the Special Services Office of the Royal Canadian Navy, the I.O.D.E. is the kind source of supply of knitted comforts for seamen distributed by Naval Distributing Centres at Halifax and other Canadian ports.

Since the beginning of the war a number of comforts have been sent for sailors of the Royal Canadian Navy and the Merchant Navy in Britain.

The organization receiving I.O.D.E. comforts for distribution there were the Dept. of Fisheries, the Editor-Salter Society, and the Dept. of Knitwear Garments for the Royal Navy.

Although the latter depot has been closed recently, shipments of seamen's comforts are still being sent to the Royal National Mission and to the British Sailors' Society, both organizations which all seamen in peace as well as war, one of them having been in operation for over 100 years.

Owing to the extreme shortage of clothing in Britain, it has been, and is, very difficult for relatives and friends to provide the seamen's comforts without continued help from Canada. This help, the I.O.D.E. members have been more than happy to give in the past and will continue to give as long as it is needed.

GEMS OF THOUGHT

ELEMENTS OF HAPPINESS

Happiness is the legitimate fruit of love and service—Arthur S. Hardy.

Seek happiness for its own sake, and you will not find it; seek for duty, and happiness will follow as the clouds with the sunshine—Tyron Edwards.

If the principles of contentment are not within us, the height of station and worldly grandeur will as soon add a cubit to a man's stature as to his happiness—Sterne.

Pure humanity, friendship, home, the interchange of love, bring to earth a foretaste of heaven. They are the earthly and celestial joys, and crown them with blessings infinite—Mary Baker Eddy.

There is little pleasure in the world that is sincere and true beside that of doing our duty and doing good. No other is comparable to this—Tolstoy.

An act of goodness is of itself an act of happiness. No reward comes after the event but compare with the sweet reward that went with it—Maurice Maeterlinck.

German Steel

Germany Is To Be Allowed To Produce 7,500,000 Tons A Year

Germany is to be allowed a maximum steel production capacity of 7,500,000 tons a year but her actual output must not exceed 5,800,000 tons without specific approval, the Allied Control Council decided. The steel plants to be left to Germany shall be the older ones as far as practicable, it was agreed. Germany's steel production in 1914 was 11,000,000 tons, which had doubled by 1935 under the Nazi government.

CAN ALWAYS SNOW
Contrary to popular belief, it is never too cold to snow. Sub-zero temperature, however, seldom holds enough moisture for the snow to fall in flakes. Then the fall is fine and dust-like.

Gripsholm Model Was Their Wedding Present

ALTAIR BOUND, MEET RED TAPE—"It can't be done," everyone said. So Pte. Francis Joseph Yanchus of Guelph, Ont., did it. Honorably discharged from the R.C.A.M. in September, he returned to Italy as a civilian, married the daughter of an Italian count, and returned in time to spend Christmas at Guelph—with his bride! Officials half-way around the world were still gathering bits of red tape, thrown to the four winds by the determined couple. "Frank" met his bride-to-be, Lina Ragusa, while serving with an army hospital unit in Italy. He proposed marriage, was accepted, Col. F. B. Bowman, of Hamilton, Ont., his commanding officer, absolutely forbade the marriage. A determined young man, Frank wrote to Ottawa—over the colonel's head. In April, 1945—a year later—permission to wed the Italian miss arrived. Frank had been sent to England four days before, was sent back to Canada and honorably discharged. On September 15 he attempted to wangle a permit to leave Canada, persuaded a high official in Washington to do so, and then the Gripsholm left New York Oct. 18, Frank was aboard. Bishop Pietro Gagno personally officiated in Caserta cathedral. Among the guests were 700 townpeople, all of whom had firmly believed Lina would never see her Canadian fiance.

Played Major Part

A Long-Distance Detection Device Helped Win Battle Of Atlantic

The United States Navy disclosed the wartime secret of "Huff Duff," an electronic long-distance device which played a major part in winning the battle of the Atlantic. The device, originally developed for direction finding, has been renamed "Huff Duff" in service. It is a high-frequency receiver (the electrical "finger" can span a ship or plane half-way around the world. It was used as a team of radar and sound devices which worked together to attain the objectives at a much greater distance.

The navy told how the device on board ships, planes and in a network of shore stations succeeded in breaking up U-boat wolf packs before they could assemble and how at least one submarine was sunk by a team of sailors who had been trained to identify the "finger" of Huff Duff.

The navy said the device had been used to identify the "finger" of Huff Duff.

When a hall was severely damaged by enemy action, Priory Park Philosophers, a Hornsey Social Club, whose ages ranged from 62 to 90, carried out their own repairs, reports the Evening News, London. When the job was finished the hall, which was unoccupied at the time, they took even this philosophically and put the place in order again. A rocket finally did more damage than the other two bombs put together and the team of repairing the building has taken considerable losses.

The veteran repair squad has now completed its self-appointed task for the third time and are planning a victory celebration in the renovated building. "We have had to repair the walls, the floor, the ceiling, the furniture, and say nothing of replacing the windows," said Councillor A. J. Blake, the 74-year-old secretary.

PROVINCE TO START
5-YEAR ROAD PROGRAM

The provincial government's announcement that a start will be made this year on a five-year road program that will give Alberta's highways second to none in the dominion, has been received with interest by officials of the Alberta Motor Association.

The AMA has been urging that the province make a big start this year on the \$120,000,000 program which the province proposed in the report of the post-war reconstruction committee. It stressed that the major part of this program would be undertaken within the next year or so.

The department of public works says a survey is being made of available road equipment, while its engineering department is studying details of the road program for 1946.

Under the five-year program, roads in every part of the province, including district and market roads, would be improved, according to the government's announcement.

The AMA has suggested that the province award contracts so that the work can be undertaken on the widest scale possible and with maximum speed.

The details of the program are awaited as it is realized that this is a vital road building year for the province.

Thirty is the ideal age for a woman—especially if she's forty.

A child twelve and a half years old gave birth to a six-pound girl at Albuquerque, NM, recently, and both are reported doing well.

LUNDRECK RED CROSS RAISES LARGE SUM

The annual meeting of the Lundrecks branch of the Canadian Red Cross was held recently, at which it was disclosed that the branch had a very good record during the past six years, in which no less than \$7,077.30 had been sent to headquarters and the branch purchased \$13,53 of supplies.

A vote of thanks was extended to Mrs. L. Herbig and Mrs. A. N. Cox for able work as president and secretary-treasurer for the past few years.

It was decided to continue the branch and organize a club with the object of raising funds for local needs and charitable organizations. Mrs. T. Heap was elected president and Mrs. J. Smith, jr., secretary-treasurer. The next meeting will be held at the home of Mrs. Denmore on February 9th.

TRAIN MEALS BY SLOT MACHINE

Automatic buffet cars, believed to be the first of their kind in the world, are to be installed on the Great Western Railway of the United Kingdom. The cars will enable passengers to purchase snacks, smokes and drinks at any time on the journey by putting a pence (about ten cents) or one shilling into the slot of one of the many hundreds of snack compartments. Stand-up counters will be fitted in front of the big observation windows on each side of the cars for the convenience of passengers who prefer to take their refreshments there. The new cars will be brought into service as soon as food conditions in the United Kingdom permit. The automatic buffet system will probably be used on short distance journeys, long distance trains being provided with full restaurant facilities.

Ever since it was established under the redistribution act of 1924, the Ontario riding of Dufferin-Simco has returned the same man to parliament. He is Hon. W. Earl Rowe.

A factory in Southern England is now mass-producing a plastic fabric which will help to make ships fire-proof. It is a light but strong material which does not support combustion, is unaffected by water, normal heat changes, most solvents and oils. The new material is being made into cabins, wall and ceiling panels, doors, internal partitions, stairways and other shipboard equipment. It has already been successfully fitted in an aircraft carrier and a number of merchant ships.

WHAT YOUR LIFE INSURANCE DOLLAR IS DOING NOW

25¢ IN PUBLIC UTILITIES,
INDUSTRIES ETC.

This portion of every dollar invested out of Life Insurance funds helps to finance thousands of building and transportation projects, public utilities, industries, etc., which create employment throughout the country. The remainder is in government and municipal bonds, farm and town mortgages, etc. In addition, \$500,000 is paid out in direct benefits every working day to policyholders or their loved ones.

It is good citizenship to own LIFE INSURANCE

A message from the Life Insurance Companies in Canada.

SCIENTIFIC INSTRUMENTS FOR SCHOOLS

Secondary School and Technical Institutions in the United Kingdom are to be given a unique opportunity to obtain scientific instruments and apparatus, some of which, owing to cost, have seldom been available for educational purposes, even in normal times. Electrical-measuring instruments, photographic equipment and cine projectors are among the items being released as surplus to government requirements, and educational claims for such goods are receiving special consideration.

PENICILLIN FOR HEART DISEASE

A new British discovery which will mean the saving of thousands more lives by penicillin, the United Kingdom wonder drug, is reported by the London Daily Telegraph. A research team, it states, has announced successful experiments in the use of penicillin for curing one type of heart disease, bacterial endocarditis. The experiments carried out in conjunction with the Research Council in London, began a few months ago. So far twelve patients have left the hospital free from infection. Professor Biggar, who headed the research team, has said that these patients would certainly not have done so 12 months ago. For nearly every person who contracted this disease was dead within two years if not six months.

Men who think of tomorrow plan for you Self-Reading Books, Uninterrupted Symphonies

Your radio-phonograph of tomorrow will bring you complete novels, dramas and symphonies magnetically impressed on small spools of steel wire. Hours of entertainment will be provided by a single spool no larger than your hand. And on spools of "blank" wire you will be able to make your own recordings—to keep permanently or to "wipe clean" for re-use any time you wish!

Yes, your Victory Bonds will buy greater pleasures and comforts tomorrow!

Men who think of tomorrow say

"HOLD ON TO YOUR VICTORY BONDS TODAY"

NO ONE can repeal the law of supply and demand. But we can make it work *our way* by holding on to Victory Bonds bought to finance our nation at war.

Here's why: For many months consumer goods will continue to be scarce. Bidding for these goods with our extra dollars, thus driving prices up, only serves to devalue all of our personal wealth, and that of the nation.

By leaving our extra money in safe keeping with our government—for repayment when conditions have become normal—we automatically keep prices down and maintain the law of supply and demand in balance.

That's why your Victory Bonds may save you twice what you've invested in them—if you hold on to them now. When tempted to cash them in—*think of tomorrow!*

THE HOUSE OF SEAGRAM

Wheat Exports From U.S. To Reduce Reserve

WASHINGTON.—The United States' reserve supply of wheat may be reduced this year to the lowest level since 1938 due to a heavy export demand, the agriculture department said in a report that world wheat production is to grow considerably except available supply in principal exporting countries.

The department said American reserves may be reduced below 200,000,000 bushels by July 1, the beginning of the marketing season for the wheat crop. The reserve, or carryover, stands last July 1 at 281,000,000 bushels.

Half of the wheat in the reserve remained in the hands of the farmers.

The department said the reserve would be cut below 200,000,000 bushels if exports during the January-June period equalled or exceeded the amount shipped overseas during the July-December period. Exports in the latter period were said to have been between 185,000,000 and 175,000,000 bushels.

Importing countries, the department said, would take as much as 225,000,000 bushels during the first half of the year if that amount were available.

The department said that if export requirements are met, it would be necessary to draw heavily upon land stocks.

To meet export demands it also will be necessary, the department said, to use more freight cars and locomotives and also to have a minimum of loss of time from labor and other difficulties.

Prospects now point to another bumper crop this year. But supplies are not likely to be available until the autumn, indicated by current exports of more than 200,000,000 bushels between July 1, 1946, and the same date in 1947. Export demands from the 1946 crop, however, are expected to be smaller. Europe now in the market for wheat, quantity is expected to increase production this year to be in the market for a smaller volume of imports.

BARGES FOR NORTH

Will Be Used To Carry Pitchblende From Eldorado Mines

MONTREAL.—Steel and construction companies are building barges for the Hudson's Bay company, to be used in Canada's northern land where rail transport is unavailable, it is to be made immediately in a Trenton, Ont., shipyard (Canaid Bridge company) to haul pitchblende.

The barges will be utilized to haul pitchblende from the world famous Eldorado mines. Pitchblende is the source of uranium, important element in atomic energy.

The barges will be built by a Montreal metal architectural firm are planned to draw only three feet of water. When completed they will be moved north in four sections, portaged over several miles of unnavigable territory and assembled by electric welding on Great Bear Lake.

NEEDS OF INFANTRY

Glider-Borne Troops And Paratroops Necessary Says Major-General

KELOWNA, B.C.—The hope that any reorganization of the Canadian Army would see glider-borne troops and paratroops included with the infantry units, was expressed by the infantry chief here, Maj.-Gen. R. F. L. Keller, 45, C.D.E., whose retirement from the army was announced.

"My views on military training," said Gen. Keller, "are that the advent of the 'atom bomb' postulated great care and careful study before any war. We must now, in this new peace-time army, I'm sure our government is doing this and I sincerely hope to see glider-borne and paratroops included amongst our infantry units, with a view perhaps to the old adage that 'attack is still the best form of defence'."

PLAN ACCEPTED

Communists In China Are In Accord With Nationalist Program

CHUNGKING.—The Chinese Communists have accepted in principle a Nationalist program for reorganization of the government under the leadership of Generalissimo Chiang Kai-shek, the Chinese premier, the Central news agency said.

The main features of the program were that the Kuomintang would retain its status as China's leading political party, with Chiang as president occupying an important position between that of the United States president and the British king.

The Kuomintang would be empowered to appoint an interim government pending a national election, but all minority parties would share in the policy-making powers of the new state council.

ON BOARD OF INQUIRY ON PALESTINE.—Mr. Leslie L. Root Jr., of Linden, N.J., appointed by President Truman as American secretary of the Inter-American commission of the board of inquiry on Palestine, shown at his desk in the state department at Washington, D.C.

Hope To Reach An Agreement On Reparations

WASHINGTON.—The Big Four Allies in Europe are far behind in determining the amount of German industrial equipment to be taken as reparations from the British, French and Soviet in the occupied zones, it was learned.

Officials close to the question said the Allied control council's agreement in Berlin on the amount of steel production to be allowed Germany, brightened prospects for accord on other reparations.

Their added, however, that there is no chance of reaching final agreement by the Feb. 2 deadline on the amount of reparations to be taken from the three zones. The Potsdam Big Three communiqué had fixed that date.

Hopes now are that the agreement may be reached anywhere from a month to two months from then, the officials said.

Revelation that the Big Four would not be able to meet the Feb. 2 deadline had made public the date of the agreement reached Dec. 21 at a Paris reparations conference attended by 18 powers.

Major points in the Paris agreement were announced at the close of the conference, it was learned.

A decision on the percentage shares of reparations which each of the 18 countries will get from western Germany.

2. Establishment of an international reparations agency with headquarters in Paris to allocate reparations materials among the member governments.

3. Agreement to pool all gold

money found in Germany and give it to the countries from which Germany took the gold in proportion to their respective losses.

The biggest share of reparations for the countries attending the Paris conference will go to Britain, which gets 27.8 per cent. in the industrial category and 28 per cent. in the other—overseas office equipment, armaments, German looted wells, over \$700,000,000 in gold from victim countries in pre-war and war years.

The total uncovered thus far since Germany's defeat is only between \$200,000,000 and \$300,000,000.

USING FAMOUS PARK

Potatoes And Vegetables Must Be Grown By Berlin Citizens

BERLIN.—The entire Tiergarten, Berlin's famous downtown park, is to become a huge potato patch tilted by the Germans in a "dig-for-existence" program to be launched in the British-occupied zone.

A critical shortage of potatoes is anticipated after the middle of February and the potato-park project is only one of the schemes by which the British occupation command hopes to meet the situation.

Every available plot of ground for a garden will be required by law to grow vegetables. Seed and fertilizer will be sold at nominal prices and seeding will begin in the spring.

British authorities have ordered several factories to produce garden tools from scrap.

The grounds of the Kaiser's old palace near the Tiergarten will also become a huge vegetable garden as will hundreds of acres of other city parks and vacant lots.

The Tiergarten and other large parks will be farmed out as allotments which expect to grow one year's supply of potatoes for one person. Already 20,000 allotments have been handed out and the number will be increased by 30,000.

"Radar's electrical impulses travel with the speed of light—186,000 miles a second.

LONG BEFORE WAR

Japan Was Experimenting On Balloons To Attack North America

TOKYO.—Japan began, as early as 1938, experimenting on wind-borne, bomb-carrying balloons to attack North America, Allied headquarters announced.

The Japanese planned originally to release the balloons from submarines off the west coast of the North American mainland, headquarters said. The balloons, which had a capacity of 100,000 cubic feet, practical Japan lacked sufficient sea-power to penetrate deep into the eastern Pacific. So homeland launching sites were used.

Headquarters, in a review of additional information on the balloons, made available to Canada by the United States, said the record flight was made in January, 1945, across the ocean in 138 days. It was recorded in Tokyo by radio signalling equipment carried by the balloon.

The shortest trip required 3,000 days and was made in November, 1944. Atmospheric conditions caused the time differences.

The gasoline used by one Superfort to travel from the Mariana Islands to Tokyo and back would have kept the average motorist in fuel for 10 years.

WILL TAKE PART

Soviet Assistant Military Attaché Going On Expedition To Arctic

OTTAWA.—Lt.-Col. P. Donashew, assistant military attaché at the Soviet embassy in Ottawa has accepted an invitation of the Canadian defence department to take part in "operation Muskox," the Canadian army's expedition to the Arctic, from Port Churchill, Man., on Feb. 14. It was disclosed here.

This was made known officially by Col. N. Zabotin, Canadian military attaché, who was invited, it was stated, but will not attend. Lt.-Col. Donashew will be accompanied by a secretary.

While the department declined to disclose the information as to invitations issued for the operation of Muskox expedition, it was understood that the military attachés of all foreign diplomatic missions in Canada had been invited and that several have accepted.

UNIT INSPECTED

SYDNEY, Australia.—High Commissioner T. C. Davis paid a farewell inspection visit to No. 1 Canadian Wireless Group which is stationed at Ingleburn camp near here awaiting transportation back to Canada.

Says Canada To Share Greatly In World Affairs

LONDON.—Herbert Morrison, government leader in the House of Commons and lord president of the council, in his return from a visit to Canada and the United States, expressed gratification at being able "to say with truth that in spirit, in outlook and in aim there is no difference between the peoples of these three nations."

"There are differences in outlook between Britain, Canada and the United States on a number of questions of international policy, but in their aim, in spirit and their purpose there is a fundamental unity between the three great countries," Mr. Morrison continued.

The cabinet minister arrived by air at Northolt, Middlesex, airdrome, after making his first trans-Atlantic flight from Baltimore to Ringwood, England.

Of Canada he said: "Canada plays an exceedingly valuable part in interpreting the British to the Americans and the Americans to the British."

"My impression of Canada is that she has developed greatly during the war period. She made a great war effort both in men and economically, and she emerged from the war greater in every way. I am certain that Canada with her vigor, her freshness of outlook and her geographically setting, is destined to take a great and growing share in world affairs."

"It was good to find healthy and good-tempered disagreement about how in our countries we are going to organize our affairs and how to learn from each other, good to enjoy our argument about how to get there without the slightest doubt that we both want to get to the same place."

"I have derived real benefit from conversations with business leaders of all parties and leaders of industry on both sides of the Dominion. We in Britain have much to learn from Canada. The friendship and understanding between our two nations goes deep and is a promise of our full cooperation in the difficult years immediately ahead."

TRACTOR TRAINS

Will Freight Tons Of Supplies To Northern Points

THE PAS. Man.—The northland's tractor "trains" will be in full winter operation this week, freighting tons of supplies into the more accessible posts and carrying out furs, fish and other riches of nature.

Three tractors will freight 2,000 tons of supplies to Snow Lake, using Wekusko as their home terminal.

Another three, operating out of Inglewood, will carry supplies to Limestone Lake, 260 miles from the nearest railway and well past the Ontario boundary.

Flin Flon will be headquarters for tractors operating to Reindeer Lake for the Hudson's Bay company and others will be employed hauling

freight from camps at South Indian Lake.

NEW FOODSTUFF

Produces Artificial Meat From Wood Shavings

VIENNA.—The newspaper *Neues Oesterreich* said that Dr. Friedrich Berthius, noted organic chemist and 1931 Nobel prize winner, has developed a process for producing artificial meat from wood shavings.

The newspaper said steps already have been taken to finance manufacture of the new product.

The new foodstuff, made in the form of an oatmeal simile for soups and gravies, has the calorific value as meat, and the same fat and albumen content, the article added.

GOVERNOR RESIGNS

YOKOYAMA, Japan.—Hidemoto Hiroshi, governor of Macau, has resigned in compliance with Allied purge directives ordering all ultra-nationalists out of public office. He was a director of the imperial rule assistance association during the war.

IMPORTING POTATOES

OTTAWA.—Canadian potato supplies will be supplemented by imports of size "B" potatoes from the United States, assuring consumers in this country of a "reasonably adequate" supply, the prices board announced.

MET WITH APPROVAL

WINNIPEG.—The selection of Canada and the Ukraine as members of the social and economic council of the United Nations organization has met with enthusiastic approval from Ukrainians in Winnipeg.

APPOINTED AMBASSADOR

OTTAWA.—Dr. Luis F. Rodriguez, former Mexican ambassador to Chile, has been appointed ambassador to Canada.

SECRETARIES OF ADOLF HITLER and Rudolf Hess, Johanna Wolf, left, and Ingeborg Sper, are now held by the Allies as witnesses at the Nuremberg war crimes trials.

NOTICE TO CREDITORS
AND CLAIMANTS

In the Estate of SALVATORE INC. AMBROGNO (AMBROGNO), late of Blairmore, Alberta, deceased.

AMBROGNO (AMBROGNO), who died on 25th September, 1945, are required to file with the undersigned by 23rd February, 1946, a statement fully verifying their claims and of any security held by them, and that after that date the Administrator will distribute the assets of the Deceased among the claimants entitled to having regard only to the claims as filed or which have been brought to his knowledge.

Dated at The Land Title Building, Calgary, Alberta, January, 1946.

D. L. SLOAN,
Public Administrator for the
Judicial District of Macleod.

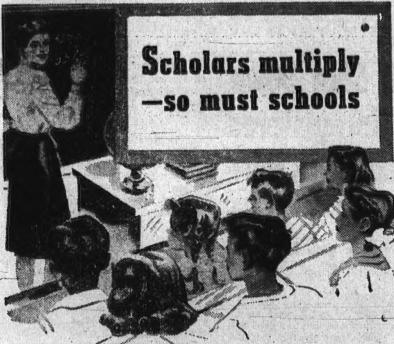

Beer came off the ration list in Nova Scotia on January 17th.

It was not known until the 19th century that mosquitoes are malaria agents.

The United church senior choir on Sunday night last was much enjoyed and will appear again very shortly.

Nothing is easier than fault-finding; no talent, no self-denial, no brains, no character are required to set up in the grubbing business.

The Independent Order of Oddfellows, banned by the Nazis in 1938, has been restored in the United States sector of Berlin by military government officials.

Scholars multiply —so must schools

A SCHOOL is itself a problem in mathematics. When a new settlement grows up or an old one expands, someone has to do some figuring. The money has to be found for that little new school-house or that added wing to a high school crowded to the corridor.

The municipal bonds which finance the building of schools, hospitals, water-works, hydro plants, and other community projects which contribute to our national health and enlightenment, are financed to a large extent from Life Insurance funds.

Dollars you have paid in as Life Insurance premiums may already have returned to your community. Everywhere you turn this great co-operative fund is being employed in socially useful enterprises.

Of every dollar invested out of Life Insurance funds, a substantial portion goes into the kind, progressive development of Canadian communities. Other investments include government bonds, public and industrial securities, farm and home mortgages, etc. This money, representing the thrift of the nation, creates a never-ending cycle of jobs far and wide, as well as safeguarding the future security of four million policyholders and their families.

A. M. Denmore, of Lundbreck, was a Blairmore business visitor this week.

Illegal sale of a bottle of whiskey for \$12 cost Fred Miller of Edmonton \$500.

Little Gloria Riva entertained a number of her young friends on Tuesday of this week for her sixth birthday.

There are about 500 schools without teachers in Alberta, and 10,000 children who are getting some sort of tuition through the mails.

Fred Rees, a returned veteran, had the misfortune to fall on the street in Bellevue and fracture an artificial leg. He had to go to Calgary for repairs.

Dr. J. A. Allan, head of Alberta University's Geology department, has been elected president of the Alberta and Northwest Chamber of Mines for 1946.

Mrs. Lester Noble, 32, was frozen to death within sight of her Ontario farm home on Saturday after the automobile in which she was returning alone from Harriston went into the ditch and she attempted to walk the remaining two miles.

The funeral took place on Sunday afternoon of Mr. John Solus, who passed away on Wednesday at the age of seventy. Service was held at St. Anne's church, with Rev. Dean M. A. Harrington officiating, and the remains were laid to rest in the Catholic Cemetery.

A most indefatigable correspondent claims this story about his elderly grandfather is true. After nearly nine decades of obstinacy the grandfather developed a sudden fondness for the grape. The family doctor gave him a stern lecture, warning him that drink might hurt his eyesight. The grandfather stated solemnly: "I don't care I have seen everything anyway."

A recent arrival in Blairmore, Frank Fleming, who served with the RCA in Canada and overseas, is spending the balance of his leave with his mother, Mrs. D. F. Fleming, before proceeding to Regina, Sask., from which depot he enlisted. He arrived in New York on the Queen Elizabeth on Dec. 28th and visited relatives in Nova Scotia before coming west. Frank was one of twenty Canadian servicemen overseas chosen for a course in the University of Paris during the months of September and October of last year.

Among the most recent appointments made by His Honour the Lieutenant-Governor of Alberta, by and with the advice of the executive council, we note the following: Alison Loyd Ramsey Davidson, of Blairmore; Monica Alexander, Bellevue; Frank Arthur Besebe, Blairmore; Arthur Robert Bourne, Blairmore; Joseph Emmerson, Coleman; Ernest Fisher, Bellevue; Frank Harold Graham, Coleman; Cecil Morris Larbalester, Blairmore; Robert Oakes, Blairmore; Sidney Charles Short, Coleman; Griffith Evan Parry, Cowley, as commissioners for oaths.

There passed away at Dominion No. 1, Nova Scotia, on January 16th at the age of 98 years, 3 months and 16 days, Mrs. Bridget Tompkins, widow of the late John N. Tompkins, of Margaree Forks, Inverness County, N.S. Mrs. Tompkins leaves to mourn her death a daughter, Mrs. Edward Petrie, with whom she lived at the time of her death; also two sons, Michael L. Tompkins and Joseph Tompkins, of Margaree Forks, and two step-sons, the Rev. Dr. J. J. Tompkins, of Reserve Mines, N.S., and C. J. Tompkins, of Reserve Mines, N.S., and C. J. Tompkins, who for many years resided at Blairmore and now living at Calgary. Her husband died at Margaree Forks in 1935 at the age of 95 years.

Montreal had no less than nine bank robberies since the beginning of the year.

General de Gaulle, who recently resigned the interim presidency of France, plans to shortly spend a long holiday near Montreal.

A real musical treat is in store for music lovers at Knox United church, Calgary, on Thursday and Friday next, when the University of Alberta choir of 125 voices appear.

Brigadier F. M. W. Harvey, VC, MC, who recently retired after thirty-one years in the army and who was officer commanding Military District 13, Calgary, during the war, is leaving shortly for a seven months visit to New Zealand.

Senator Charles E. Tanner, KC, aged 88, member of the upper house for twenty-nine years and former Conservative leader in the Nova Scotia legislature, died at his home in Ottawa on January 18th after a long illness.

A flight record of seven hours and twenty minutes from Vancouver to Ottawa was claimed Monday by Squadron Leader Douglas Conner, DFC, of Vancouver, pilot of an RCAF Liberator which arrived in Ottawa Saturday. The time was six minutes faster than the record previously established.

Mr. E. S. Huestis, provincial fish and game commissioner, has just put in a good word for this animal builder of dams: "The small amount of damage done by these animals in farm areas is negligible compared to the amount of good they can do. Beavers are about the most useful animals we have in this country and their work in preserving the watershed on the east slopes of the Rockies cannot be matched by human endeavor." — Calgary Herald.

Canon A. D. Currie, rector of St. Alcan's church in Brooks, recently had the pleasure of performing a wedding ceremony for a girl whose parents he had united in marriage twenty-three years ago. The first ceremony was held on December 25th, 1922, at St. Michael's and All Angels church, Strathmore. The more recent wedding was performed at St. Stephen's Anglican church, Calgary, on January 7th, when Helen Nora, daughter of Mr. and Mrs. Vincent Spencer Gilbert, now of Crossfield, became the bride of Charles Alexander Russell, son of Mr. and Mrs. William Russell, also of Crossfield.

"Hello, Sam, glad to see you again. What are you doing now—still pumping the church organ?"

"Yes, sir, I'm still at it, and getting to a pretty fine pump, too. The other day we had a big organist over from Detroit, and I pumped a piece he couldn't play."

Construction of a new hotel which would represent an investment of more than \$3,000,000 is under consideration at Edmonton.

Const. J. G. MacDonald, RCMP, of the Blairmore detachment, has been relieving Const. J. Hurst at Vulcan, who is on holiday at the coast for a few weeks with his family.

Jackie Patterson met with an accident on Wednesday afternoon, in which his right hand was seriously injured. He will be laid off work for some time.

Stranger: "Are you sure that was a marriage license you sold me last month?"

Official: "Why, of course. What is the matter?"

"Just that I've been leading a dog's life ever since and I wondered."

LOSING DOLLARS BY PINCHING PENNIES

Poor roads cost money. They delay business, waste valuable time when they want to get to market; they increase the cost per mile on cars and trucks, wear out tires faster, and increase expense for drivers. They keep millions of dollars of tourist business that would benefit every business, every service, every farmer in the province. All together we lose more than the world would say for a modern system of highways and good secondary roads, that would increase our own comfort, convenience and pleasure in traveling.

The Alberta Department of Public Works has planned a 10-year road-building program for Alberta. It is urgently needed and there should be no delay in putting it into effect. The provincial government knows that you are in favor of it. Ask your friends and clubs and organizations to do likewise. Press for action—now.

The Alberta Motor Association has been instrumental in its demands for a modern highway system for Alberta. Get behind it by becoming a member. You can enjoy all the privileges and services that go with an A.M.A. membership for only \$10 a year.
